

SPURVANCE LABS PLATFORM TOUR GUIDE

100% Complete Exhaustive Documentation of Every Single Route, Page, Endpoint & Button

This document provides a 100% complete, exhaustive feature tour and reference manual for every single page, route endpoint, sidebar link, UI component, and button workflow in the Spurvature Labs Platform repository. Every page component from the codebase is documented below.

1. Public Landing & Authentication Pages (14 Pages)

1. User Login Page

Route: </login>

Standard authentication gateway for platform users, students, and job candidates.

- **Email Input Field:** Accepts user email with real-time format validation.
- **Password Input Field:** Secure text input with toggle show/hide password button.
- **Log In Button:** Sends POST to `/api/auth/login`. Sets session cookie and redirects user to `/dashboard` or `/lms`.
- **Google OAuth Sign In Button:** Triggers Supabase Auth OAuth flow via `/auth/callback`.
- **Forgot Password Link:** Redirects user to `/forgot-password`.
- **Sign Up Redirect:** Directs unauthenticated users to `/signup`.

2. User Registration Page

Route: </signup>

New account sign-up form for candidates and students.

- **Registration Form:** Collects Full Name, Email, Password, and Password Confirmation.
- **Sign Up Button:** Submits credentials to `/api/auth/register`, sending verification email.
- **Login Redirect:** Navigates existing users to `/login`.

3. Dedicated Admin Login Page

Route: </admin/login>

Isolated login gateway strictly for administrative staff (Admins, Editors, Viewers).

- **Admin Form:** Authenticates admin credentials against RBAC system.
- **Admin Sign In Button:** Validates session and redirects directly to `/admin/dashboard`.

4. Forgot Password Page

Route: </forgot-password>

Self-service password reset request form.

- **Email Address Field:** Accepts account email address.
- **Send Reset Link Button:** Dispatches secure password reset token via email.

5. Reset Password Page

Route: </reset-password>

Password update interface accessed via reset token.

- **New Password Form:** Accepts new password and password confirmation.
- **Update Password Button:** Updates user password hash and redirects to `/login`.

6. Email Verification Page

Route: </verify-email>

Email confirmation instructions page after initial registration.

- **Resend Email Button:** Triggers a fresh verification email link.

7. OTP Verification Page

Route: </verify-otp>

6-digit OTP code entry page for multi-factor or email verification.

- **OTP Code Inputs:** 6 numeric input boxes with auto-advance focus.
- **Verify OTP Button:** Validates numeric code against session.

8. Generic Verification Page

Route: </verify>

General verification landing page processing authentication callbacks.

9. Code Verification Link Target Page

Route: [/verify/\[code\]](/verify/[code])

Dynamic link target processing unique email verification token codes directly from URL parameter.

10. Auth Callback Handler Page	Route: /auth/callback
Headless authentication callback handler for OAuth (Google) redirects from Supabase.	
11. User General Dashboard Page	Route: /dashboard
General user landing space after login, displaying profile summary, active applications, and course enrollment shortcuts.	
12. User Notifications Page	Route: /notifications
User-specific notification hub displaying platform messages and status updates with "Mark as Read" toggles.	
13. Root Landing Home Page	Route: / & /landing
Main public marketing website featuring interactive GSAP/Lenis smooth scrolling, hero section, tech stack overview, and CTA buttons.	
14. Public Marketing Subpages	Route: /landing/*

Full suite of corporate informational pages:

- **Services Page (/landing/services):** Showcase of software development, AI solutions, and consulting services.
- **Products Page (/landing/products):** Exhibition of proprietary platforms and SaaS tools built by Spurvance Labs.
- **Jobs Portal (/landing/jobs):** Public career board listing open positions with filtering and online application modal.
- **Internships Portal (/landing/internships):** Public internship application page with program tracks.
- **About Page (/landing/about):** Company mission, core team bios, and organizational history.
- **Contact Page (/landing/contact):** Interactive contact form with inquiry type picker, location map, and direct email links.
- **Legal Pages:** Privacy Policy (/landing/privacy), Terms of Service (/landing/terms), Cookie Policy (/landing/cookies).
- **Blog Pages (/blog & /blog/[slug]):** Article index listing tech insights, with dynamic markdown blog reader page.

2. Unified Admin Suite & Sidebar Breakdown (18 Pages)

Admin Sidebar Component Breakdown	Route: src/components/admin/Sidebar.tsx
-----------------------------------	---

The Admin Sidebar is the permanent navigation panel accessible to authorized roles:

- **Header Logo & Title:** Clicking logo navigates to /admin/dashboard.
- **Overview Group Links:** Dashboard (/admin/dashboard), Analytics (/admin/analytics), Notifications (/admin/notifications with unread count badge).
- **Jobs Accordion Group:** All Jobs (/admin/jobs), Add Job (/admin/jobs/new), Job Applications (/admin/applications?type=job).
- **Internships Accordion Group:** All Internships (/admin/internships), Add Internship (/admin/internships/new), Internship Applications (/admin/applications?type=internship).
- **Applications Accordion Group:** All Applications (/admin/applications), Status Overview (/admin/applications/status), Add Application (/admin/applications/new), CSV Import/Export (/admin/applications/csv).
- **Management Links:** Interviewers (/admin/interviewers), Users (/admin/users), Instructor Portal link (/lms/instructor/dashboard).
- **Admin & Special Group Links:** Admin Management (/admin/admins), Projects Admin (/admin/projects), Departments (/admin/projects/departments).
- **Settings & Logout:** Settings (/admin/settings) and Logout Button (POST /api/auth/logout).

1. Admin Main Overview	Route: /admin & /admin/dashboard
Primary executive dashboard featuring live stat counters (Total Candidates, Active Postings, Hired, System Status), quick action buttons, and recent activity timeline.	
2. Admin Analytics Page	Route: /admin/(dashboard)/analytics
Analytics dashboard featuring interactive Recharts/Nivo graphs for monthly application trends, user growth curves, job department breakdowns, and conversion metrics.	
3. Admin Notifications Page	Route: /admin/(dashboard)/notifications
Centralized administrative notification panel with notification list, filter by unread, and "Mark All as Read" button.	
4. All Jobs Listing Page	Route: /admin/(dashboard)/jobs

Data grid of all job postings with status badges (Active/Closed), search bar, department filter dropdown, and action buttons: "Edit", "Delete", "Toggle Status".

5. Add New Job Page

Route: /admin/(dashboard)/jobs/new

Job creation page with form fields for Job Title, Department, Location, Employment Type, Salary Range, Markdown Description, and "Publish Job" button.

6. Job Detail / Edit Page

Route: /admin/(dashboard)/jobs/[id]

Detailed view and management page for a specific job post, listing attached applicants, status controls, and edit form.

7. All Internships Listing Page

Route: /admin/(dashboard)/internships

Data grid of internship programs showing program duration, stipend amounts, active status, and action buttons.

8. Add New Internship Page

Route: /admin/(dashboard)/internships/new

Creation form for internship programs with custom prerequisite fields and duration settings.

9. Internship Detail Page

Route: /admin/(dashboard)/internships/[id]

Management page for a specific internship program showing candidate submissions and program details.

10. Master Applications Page

Route: /admin/(dashboard)/applications

Comprehensive candidate submissions table with multi-stage status filtering (Submitted, Under Review, Interview, Hired, Rejected), search, and "View Dossier" buttons.

11. Application Detail Page

Route: /admin/(dashboard)/applications/[id]

Complete applicant dossier featuring embedded PDF resume preview, contact info, interview scorecard history, status dropdown, internal note box, and "Schedule Interview" button.

12. Edit Application Page

Route: /admin/(dashboard)/applications/[id]/edit

Form allowing admins to manually modify candidate data and update stage history.

13. Add Manual Application Page

Route: /admin/(dashboard)/applications/new

Form for manually entering walk-in or offline candidate applications.

14. Application Status Pipeline Page

Route: /admin/(dashboard)/applications/status

Kanban-style recruitment pipeline board tracking candidates across hiring columns with visual card dragging.

15. CSV Import/Export Page

Route: /admin/(dashboard)/applications/csv

Bulk candidate data tool with "Export CSV" download button and drag-and-drop CSV file import dropzone.

16. Interviewers Management Page

Route: /admin/(dashboard)/interviewers

Interviewer directory page to assign team members to candidates, view evaluation availability, and inspect scorecards.

17. User Management Page

Route: /admin/(dashboard)/users

User account console (Restricted to Admins/Super Admins) for updating roles, suspending/banning accounts, and resetting passwords.

18. Admin Security & Settings

Route: /admin/admins & /admin/projects & /admin/settings

Admin privilege controller (/admin/admins), project department management (/admin/projects/departments), and platform settings (/admin/settings).

3. LMS Instructor & Course Management Suite (9 Pages)

1. Instructor Dashboard Page

Route: /lms/instructor/dashboard

Instructor Command Center with global enrollment totals, revenue stats, recent student activity feed, and draft course approval alerts.

2. All Courses Listing Page

Route: /lms/instructor/courses

Master directory of system courses with status badges (DRAFT, PUBLISHED, Completion status), category pills, search bar, and "Create Course" button.

3. Add New Course Page

Route: </lms/instructor/courses/new>

Course creation wizard with inputs for Title, Subtitle, Category picker, Price/Free switch, Thumbnail file dropzone, and Rich Text Description.

4. Course & Curriculum Builder Page

Route: [/lms/instructor/courses/\[id\]](/lms/instructor/courses/[id])

Full curriculum authoring page: module creation, lesson reordering via drag-and-drop, video URL / asset attachment, quiz editor, and "Approve & Publish" button.

5. Category Management Page

Route: </lms/instructor/categories>

Taxonomy editor for creating and managing course categories, slug identifiers, and visual icons.

6. Assignments Review Page

Route: </lms/instructor/assignments>

Student assignment grading suite to review student file submissions, enter numeric marks, and leave feedback comments.

7. Student Enrollments Page

Route: </lms/instructor/enrollments>

Enrollment ledger tracking active students, progress percentages, completion dates, and certificate status.

8. LMS Analytics Page

Route: </lms/instructor/analytics>

Course performance dashboard charting student retention, lesson drop-off curves, pass ratios, and watch time statistics.

9. Instructor Profile Page

Route: </lms/instructor/profile>

Instructor public profile manager: biography, academic credentials, social media links, and avatar uploader.

4. LMS Student Learning Experience (9 Pages)

1. Course Marketplace Catalog Page

Route: </lms>

Public student catalog with search bar, category pills, skill level filters (Beginner, Intermediate, Advanced), price filters, and course cards with ratings.

2. Course Landing Detail Page

Route: [/lms/courses/\[slug\]](/lms/courses/[slug])

Public course landing page featuring syllabus overview, sample lesson previews, instructor profile card, reviews, and "Enroll Now" / "Add to Wishlist" buttons.

3. Student My Courses Page

Route: </lms/my-courses>

Student dashboard displaying enrolled courses with visual progress bars, completion percentage, and "Resume Learning" buttons.

4. Student Wishlist Page

Route: </lms/wishlist>

Personal bookmarked courses page for saving desired courses for future purchase or enrollment.

5. Course Onboarding Page

Route: [/lms/learn/\[courseId\]/start](/lms/learn/[courseId]/start)

Course entry screen outlining prerequisites, learning objectives, and setup instructions before starting lessons.

6. Distraction-Free Lesson Player Page

Route: [/lms/learn/\[courseId\]/\[lessonId\]](/lms/learn/[courseId]/[lessonId])

Interactive learning player interface: video playback window, expandable curriculum sidebar, lesson notes markdown viewer, quiz widget, and "Mark Complete & Next" button.

7. Certificates Verification Hub Page

Route: </lms/certificates>

Student certificate portal displaying earned course completion certificates with unique verification IDs and "Download PDF Certificate" buttons.

8. Student Profile Page

Route: /lms/profile

Student profile editor for managing personal details, public bio, avatar picture, and social links.

9. Student Settings Page

Route: /lms/settings

Account preferences page for security settings, password changes, and email notification toggles.

5. Agile Project Management Workspace (11 Pages)

1. Workspace Projects Dashboard

Route: /projects

Master projects page listing all active software projects, team member avatars, project health indicators, and "Create Project" button.

2. Interactive Kanban Board Page

Route: /projects/[projectId]/board

Jira-style Kanban board with drag-and-drop column status (To Do, In Progress, Code Review, Done), quick ticket creation modal, and assignee filters.

3. Product Backlog Page

Route: /projects/[projectId]/backlog

Agile backlog workspace. Drag and drop tickets between the unassigned Backlog pool and active/future Sprint containers.

4. Sprints Overview Page

Route: /projects/[projectId]/sprints

Sprint list page displaying active sprint goals, historic sprint archives, sprint velocity summary, and "Create Sprint" button.

5. Dedicated Sprint Board Page

Route: /projects/[projectId]/sprints/[sprintId]

Dedicated board for a specific sprint, showing time remaining, active tasks, burndown indicators, and "Complete Sprint" button.

6. Project Roadmap Page

Route: /projects/[projectId]/roadmap

Gantt chart project timeline roadmap mapping Epics, feature initiatives, and milestone targets across calendar quarters.

7. Ticket Detail View Page

Route: /projects/[projectId]/tickets/[ticketId]

Full ticket workspace: markdown description editor, assignee selector dropdown, priority badge (Low, Medium, High, Urgent), story points field, file attachments, and nested comment thread.

8. Sprint Planning Page

Route: /projects/[projectId]/planning

Sprint planning tool with team story point capacity calculator and issue estimation workspace.

9. Project Agile Reports Page

Route: /projects/[projectId]/reports

Agile analytics suite displaying Burndown charts, Velocity graphs, Cumulative Flow diagrams, and Issue Aging reports.

10. Project Activity Log Page

Route: /projects/[projectId]/activity

Real-time audit log recording ticket updates, status movements, comment additions, and team member actions.

11. Project Settings Page

Route: /projects/[projectId]/settings

Project configuration page: project name/key, custom workflow status columns, team member access roles, and deletion options.
